RE: DRAFT APPLICATION FOR DELTA

Dear Howard:

Attached is a copy of the proposed draft application for the above-named project. The inventors are reviewing the draft and adding the information needed to complete the application. A redraft incorporating additions and corrections will be forwarded in due course.

You will note that the background art has not been included at this time because your search was so enormous that my review still continues. I would appreciate your assistance and input on this aspect of the application. In other words, you should assess the art and select those items that are truly pertinent.

In preparing the draft, it became apparent to me that the specific details of the process should be dealt with in a separate application, and therefore I would suggest that you line up George Brandt to begin preparation of that application. I am assuming that you plan to have him prepare it since it is oriented more in the mechanical area.

I would appreciate your comments on the draft and advice as to any other information you feel is necessary to complete the application.

Very truly yours,

Susan A. Hutcheson
